Date: 2.5.2024

ATTENDEES	
Member Name	Organisation
Abi Afthab OLIKATHODI	Eurelectric
Alexandros Fakas Kakouris	Renewables Grid Initiative (RGI)
Amalfitano, Giovanni	EUTurbines
Anastasios Perimenis	CO2 Value Europe
Andrej Stancik	European Federation of Energy Traders (EFET)
Andrzej Ceglarz	Renewables Grid Initiative (RGI)
Bram Claey	Regulatory Assistance Project
Franklin Streichenberger	CO2 Value Europe
Grzegorz Pawelec	Hydrogen Europe
Hennig, Eva	Eurogas, GD4S, GEODE, CEDEC (Gas DSO Associations)
Joni Karjalainen	Climate Action Network (CAN) Europe
Marie Margot Manon Guérin	Equinor
Martha Frysztacki	Open Energy Transition
Martin Roach	The European Association for Storage of Energy (EASE)
Sebastian Porras Aparicio	T&D Europe
Tobias Bühnen	Gas Infrastructure Europe - GIE
Veerle Beelaerts	EHI
Vidushi Dembi	WindEurope
Observers Name	Organisation
Jan KOSTEVC (ACER)	ACER
Stefano ASTORRI (ACER)	ACER
Lea Dehaudt	ENTSO-E
Roberto Francia	ENTSO-G
Alexander Kättlitz	ENTSO-G
Joan Frezouls	ENTSO-G
Kamila Paquel	ESABCC
Co- convenors & vice-convenors	Organisation
Andrzej Ceglarz	RGI
Eva Hennig	Gas DSOs in CEDEC, Eurogas, GD4S, GEODE
Bram Claey	RAP

AGENDA POINTS

10.30-11.00
am

1. Welcome
2. Introduction of the new SRG Members
3. Update form the working groups for the 2026 TYNDP process
4. AOB

SUMMARY	
Point 2	The SRG welcomes the new members Martha Fryszacki from Open Energy Transition and Martin Roach from EASE. The convenors organized an onboarding call about the current workstreams and rules within the SRG.
Point 3	<p>WG1: Ongoing discussion about the storyline updates and inclusion economics variants . Next meeting is planned for the 15.5.2024 13:30-15:00, where the ENTSOs will present their first ideas how to include the economic variants into the scenarios and the storylines. Second main topic is the “Roadmap document on innovation” for the 2026 cycle, which will be coordinated with the other WGs and the ENTSOs after the 2024 TYNDP reports will be published.</p> <p>WG2: Two workshops on the ETM and EV modelling planned with the ENTSOs. In the workshops a deeper understanding for the mechanisms, reference data and assumptions within the ETM and Plexos shall be reached. For the ETM workshop a questionnaire is in preparation and will be finalized until the end of the week. In addition the WG2 is collecting all available reference data from the EU, member states and stakeholders on the different demand sectors. The members of the SRG are encouraged to contribute to this effort as it will help to make the demand calculation more precise and more UpToDate. The modelling of district heating would be the next topic with a close cooperation between WG2 and WG3.</p> <p>WG3: The WG is leading on a large variety of topics, therefore a list of priority topics has been discussed. Next meeting is on 3.5.2024 to finalise the priority list and split the work into sub WGs.</p> <p>WG4: The first two meetings concentrated on a collective understanding of the WG members and the explanation of the ENTSOs how the elements of carbon management, CO2-transport, CCU and CCS are included currently in the TYNDP 2024 process. First ideas were discussed for the modelling within the 2026 cycle and how the WG can contribute to this work.</p> <p>Internal working groups for the 2026 cycles within the ENTSOs are not set up yet. For the time being the current members of the existing groups are acting as the contact persons for the SRG.</p>
Point 4	<p>The invitations for the future SRG Weekly meetings were sent out to the members. For a better long-term planning for the members and the convenors it seems more practical to set the meeting every week at the same day and time. The meetings – starting from 8.5.2024 will be every Wednesday afternoon 4.00-4.30 pm.</p> <p>The convenors had a meeting with the EU Commission about a potential participation and presentation at the second of the Infrastructure Copenhagen Forum on 27.6.2024.</p> <p>Timeline: The results of the 2024 TYNDP will be published on 22.5.2024. In the second week of June (exact date is not yet fixed) the TYNDP 2024 results will be discussed and the TYNDP 2026 started at the public workshop. In September/October the data collection at the national level starts. To avoid overlapping work between the SRG, ENTSOs and the nations TSO a meeting will be organised between the chairs of the WG, the convenors and the ENTSOs.</p>

ACTIONS		FOLLOW-UP + RESPONSIBILITY
Action 1	WG2 set date for ETM workshop with ENTSOs	Abi, ENTSOs → date is set for the 7.5.2024 2-4 pm
Action 2	WG2 set date for EV modelling workshop with ENTSOs	Abi, ENTSOs
