SUMMARY

Point 2	<p>WG1: At the next WG1 meeting on 15.5.2024 (13.30-15:00) the ENTSOs will present their current findings on different options of the consideration of economic variants in the scenarios. This shall be further discussed within the WG.</p> <p>WG2: On 7.5.2024 a workshop was organized on the details of the ETM together with a specialist of the ENTSOs. The Members of the WG thank the ENTSOs for the opportunity to clarify many questions on the functions and assumptions within the ETM. Next step will be a workshop on the EV modelling and a meeting with the members of the demand working group within the ENTSOs. The collection of reference data is ongoing.</p> <p>WG3: 5 key working priorities have been identified. The members of the WG were asked to fill in their participation in the 5 priority tasks to organise the work. Next meeting is on 17.5.2024 10:00-11:00 to discuss about data requirements and potential changes in the tools.</p> <p>WG4: The WG is in discussion with ENTSOs to define how the members expertise can be brought into the future scenario work.</p>
Point 3	<p>The report of the ENTSOs on the Interlinked Model was published on 7.5.2024 https://www.entsoe.eu/news/2024/05/07/entsog-and-entso-e-publish-their-joint-electricity-and-hydrogen-interlinked-model-2024-progress-report-for-public-consultation/. A consultation is ongoing until 18.5.2024.</p> <p>Even if the Interlinked Model is not part of the scenario work itself, the results of the latest report can help the SRG members to better understand the steps following the final scenarios. The ENTSOs will present a short summary of the publication in one of the next weekly meetings.</p>
