ATTENDEES	
Member Name	Organisation
Alexandre Oudalov	T&D Europe
Federico Dona'	EUROFER
Ganni Vassallo	Bellona
Giuseppe Lorubio	EHI
Gregor Frey	Eurogas, GD4S, GEODE, CEDEC (Gas DSO Associations)
Grzegorz Pawelec	Grzegorz Pawelec
Joni Karjalainen	Climate Action Network (CAN) Europe
Marie Margot Manon Guérin	Equinor
Marion Malafosse	smartEn - Smart Energy Europe
Martha Frysztacki	Martha Frysztacki
Martin Roach	The European Association for Storage of Energy (EASE)
Vidushi Dembi	WindEurope
Observers Name	Organisation
Franck Dia Wagoum (Guestspeaker)	ENTSO-E
Lea Dehaut	ENTSO-E
Joan Frezouls	ENTSO-G
Dante Powell	ENTSO-G
Roberto Francia	ENTSO-G
Kamila Paquel	ESABCC
Co-Convenors & vice-Convenors	Organisation
Eva Hennig	Eurogas, GD4S, GEODE, CEDEC (Gas DSO Associations)
Bram Claeys	RAP

AGENDA POINTS

4.00-4.30 pm	<ol style="list-style-type: none"> 1. Welcome 2. Presentation on the joint electricity and hydrogen Interlinked Model 2024 progress report 3. Public workshop on the 2024 TYNDP results and kick-off of the 2026 TYNDP cycle (4. July 2024) https://www.entsog.eu/workshop-closing-2024-and-kick-2026-tyndp-scenarios-cycle#welcome 4. Update form the working groups for the 2026 TYNDP process 5. Takes-away for the TYNDP from the Draft Council conclusions on Advancing Sustainable Electricity Grid Infrastructure 6. AOB
--------------	---

SUMMARY	
Point 2	<p>The ENTSOs gave a condensed presentation into the Interlinked Model and the recently published report. More details can be found in the recording of a workshop organized for the public on the 4.6.2024. The Recording is available here: Public Webinar ILM 2024 - Progress Report (4 June 2024) (youtube.com) and the slides here: eepublicdownloads.blob.core.windows.net/public-cdn-container/clean-documents/events/2024/Public workshop on ILM Progress Report - 04062024.pdf. The SRG weekly meeting with the presentation was recorded and can be found on the Sharepoint.</p>
Point 3	<p>The public workshop on the 2024 TYNDP results and kick-off of the 2026 TYNDP cycle is organized on the 4.7.2024 from 10 am-3.30 pm. Please find the registration details here: https://www.entsog.eu/workshop-closing-2024-and-kick-2026-tyndp-scenarios-cycle#welcome. The workshop is split into a morning session where the results of the 2024 cycle and the scene setting for the 2026 cycle are presented. This part of the workshop can also be attended online. In the afternoon an interactive discussion is planned for the 2026 scenarios and the economic variants with an introduction of the ENTSOs and ACER. The SRG is invited to present its views – as much as they are developed at that stage. The afternoon is only with physical participation. Members of the SRG who wish to take part in person are asked to register as early as possible as space is limited.</p>
Point 4	<p>WG1: 15.5.2024 the topic of the variants and the 3 different proposals on the number and differentiation of scenarios was presented by the ENTSOs to the WG1 members. In a follow up internal meeting on the 28.5.2024 the SRG members discussed the economic variants in more detail. A decision on the overlying framework of the scenario options 1-3 is planned to be taken already in the week of the 10th June. As the decision on the high-level scenario framework has a strong impact on the whole two-year scenario cycle, so a detailed discussion in WG 1 would be first necessary and be followed by a wider discussion in the SRG and a voting process. The implications have to be clarified. A meeting is planned between the convenors and the ENTSOs for the 12.6.2024 to discuss on the timelines.</p> <p>WG2: a joint workshop between WG2 and WG3 is planned for the topic of flexibility services by electric heat pumps. To prepare this the chairs of the 2 WGs will meet on the 7.6.2024. It is important that double work is avoided between the WGs and information is shared between the members on topics that are overlapping. WG2 is also collecting statistical data to help set up the reference year. Quintel has designed a questionnaire to be filled out to set up the reference year.</p> <p>WG 3: the sub-groups on hydrogen and storage have met.</p> <p>WG 4: a next meeting between the WG and the ENTSOs is in planning.</p>
Point 5	<p>The conclusions of the meeting of the energy ministers of the members states on the 30.5.2024 on the topic of “Advancing Sustainable Electricity Grid Infrastructure” has been published. https://www.consilium.europa.eu/en/press/press-releases/2024/05/30/sustainable-electricity-grids-council-approves-conclusions/. The conclusions are interesting for the SRG members as they might impact the work on the scenarios.</p>

ACTIONS		FOLLOW-UP + RESPONSIBILITY
Action 1	Register for the workshop on the 4 th July	To all, https://www.entsog.eu/workshop-closing-2024-and-kick-2026-tyndp-scenarios-cycle#welcome
