## STAKEHOLDER REFERENCE GROUP FOR THE TYNDP SCENARIOS

	<p>make the link to other WG. Might be good idea if other WG would do similar exercise. Document on Sharepoint.</p> <p>Reaction from Bram: good idea to also do in WG3, starting from WG1 doc.</p> <p><u>WG2</u>: no update.</p> <p><u>WG3</u>: Had 2 meetings on 18/11/24, Focus on flexibility from heat pumps. Potential for flexibility is there, to be seen in combination with energy performance of building. Other focus on biogas/methane. EBA shared more up to date information about situation in MS. Lastly discussion on hydrogen price setting mechanism. Unfinished, will take up in follow-up meeting.</p> <p>Had a presentation about the Demand Forecasting Tool, WG2 will take this forward. Recording of meetings and presentations available on Sharepoint.</p> <p><u>WG4</u>: No update.</p>
Point 3	ENTSO propose to split in 2 separate online sessions on innovation roadmap and economic variants. Dates to be identified.
Point 4	<p>Governance structure that ENTSOs are working in, to enable SRG to contribute more effectively. Dante gives update. After approval by steering group can share a table with SRG. Before going public needs to be approved by Board and STC. Innovation team grouped innovations in 1) electricity, 2) gas and 3) EVs, HP. Would make sense for SRG to opine on 3) as ongoing work. In 2) looking at H2 price formation.</p> <p>Draft methodology presented to Steering Group, who approves (not Board). Bram asked for timeline, to guide work of SRG. Dante will take that up. Will also identify leads.</p> <p>Question (Lasse) on geographic scope. Scope includes continental Europe, but granularity in ETM outside of EU is lower.</p>

Actions	Follow-up and Responsibility
Planning document for 2025	WG2, WG3, WG4 leads
Follow-up meeting on H2 price setting	WG3
